Description of Norris Houses - T.V.A. - Division of Land Planning and Housing

Note: See key diagrams and miniature cuts, Sheets 1, 2, and 3.

These houses are planned primarily for a southern climate. Some are drawn with frame walls, and some brick veneer. No cellars included. In most types, dining space is in the kitchen (a few in the living room). Laundry tub is in the kitchen, when no separate laundry is proposed. Bathroom in every type. Norris houses are laid out for electric heating and electric range. Most of the plans can be adapted to fit other conditions. Ten of the types are illustrated by sketches as per enclosed sheet.

Type 21	Size 22 x 26	3 Rooms	Porch and stoop	Low attic	
Type N-2	Size 20 x 33	3 Rooms	Porch and stoop	Low attic
